Supplier RFP Response

Orbit Digital

Strong experience and references; vague integration plan; medium pricing

Procurement request: Design and implement a configurable supplier evaluation and procurement workflow platform, including document intake, criteria-based assessment, reporting, integrations, security controls, and ongoing support.

Executive summary

Orbit Digital proposes a solution with this profile: Strong experience and references; vague integration plan; medium pricing. The response below provides synthetic evidence for evaluation.

All companies, prices, references, timelines, and claims in this document are fictional and for software testing only.

1. Proposed Solution and Delivery

A configurable enterprise workflow solution with dashboards, document management, and reporting. Component diagrams, capacity assumptions, and workload isolation are not provided. Standard connectors will be used where available, but ERP versions, API contracts, authentication flows, and data mappings are not identified.

2. Implementation Plan and Milestones

Phase	Duration	Deliverable
Mobilization	2 weeks	Team and governance setup
Discovery	4 weeks	Requirements and integration assessment
Configuration	7 weeks	Workflow configuration
Testing & rollout	3 weeks	Acceptance and phased launch

Delivery assumptions: client provides a product owner, non-production access, and timely decisions. Dates depend on agreed scope and acceptance criteria.

3. Commercial Offer

Item	Indicative price (USD)
Implementation	$132,000
Annual support	$29,000
Integration allowance	$15,000
First-year estimate	$176,000

4. Security, Compliance and Risk Controls

Access controls, encrypted transport, backups, and security checkpoints are described. Specific certifications, independent audit evidence, encryption-at-rest configuration, logging, and retention details require confirmation.

5. Support Model and Experience

24x7 priority incident intake, service manager, quarterly reviews, escalation tree, and five enterprise workflow/document-management references, including two multi-region deployments.

Key risks and open questions

- Integration approach is underspecified.
- Security control evidence needs validation.
- Discovery may change scope, schedule, and cost.

Indicative prices are synthetic, not actual commercial offers.
